PROFESSIONAL SUMMARY

UI Engineer with 2 years of experience owning the full design-to-code pipeline. Started as a web design intern building production products, then grew into leading UI/UX design at a remote digital agency. Equal depth on both sides: UX research, design systems, and Figma on the design side; React hooks, Firebase architecture, multi-tenant SaaS, and Lighthouse 90+ performance on the engineering side. Three live B2B products built from scratch — a production ERP/POS with 300+ paying customers, a multi-tenant prepaid POS, and a complete B2B wholesale platform. The person who removes the handoff gap entirely.

SKILLS

UI Engineering: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, CSS Modules, Flexbox, CSS Grid, Responsive Design, Mobile-First

React: Hooks, Context API, Custom Hooks, React Router v6, React.lazy + Suspense, Code Splitting, useMemo, useCallback, useReducer

Animation: GSAP (ScrollTrigger, Timeline), Framer Motion, CSS Animations

UX Design: User Research, Journey Mapping, Information Architecture, Wireframing, Usability Testing, Competitive Analysis

UI Design: Figma (Expert), Design Tokens, Component Libraries, Style Guides, Developer Handoff Documentation

Backend & Cloud: Firebase (Auth, Firestore, Cloud Functions, Security Rules), REST APIs, WhatsApp Business API, Vercel CI/CD

Performance: React.memo, Lazy Loading, Bundle Optimization, Lighthouse 90+ scores, Core Web Vitals

Tools: Git, GitHub, Vite, Chrome DevTools, React DevTools, ESLint, Adobe Photoshop, Adobe Illustrator

EXPERIENCE

UI/UX Designer

Jun 2025 – Present

UMM Digital (Remote Agency)

Remote

- Lead UI/UX design across 4+ concurrent client projects — owning the full lifecycle from brief and UX research through information architecture, wireframes, high-fidelity Figma, and developer handoff documentation.
- Designed Enda (global footwear brand) end-to-end — UX research, IA, wireframes, complete Figma design system with 30+ components, and developer handoff specs. Sole contributor. Live at enda-website.vercel.app.
- Reduced design iteration cycles by ~30% through structured component libraries and design tokens — handoff documentation eliminates developer questions on every project.

UI/UX Design Intern

Dec 2024 – Jun 2025

UMM Digital (Remote Agency)

Remote

- Designed full UI systems for 3 client products (XTR, Shounya, GOG Games) — Figma to developer-ready handoff documentation, aligning visual identity with each brand's goals.
- Conducted qualitative UX research and built Figma prototypes used in usability testing. Promoted to full Designer after 6 months.

Web Developer & Designer Intern

Jul 2024 – Dec 2024

PrimeDigitals

Remote

- Designed and built Shop-ERP — a production POS/ERP (React + Firebase) that went live and now serves 300+ paying customers. Owned every design decision and every component.
- Designed the full UX system for Touchpe (5 user roles, prepaid tap-to-pay POS) and Vitran (5-role B2B wholesale distribution platform) — both now production-ready.
- Built multi-tenant React architecture with Firestore security rules, Cloud Functions for automated billing, WhatsApp API integration, and 90+ Lighthouse performance scores.

PROJECTS

Touchpe – Prepaid Tap-to-Pay POS | *React, Firebase, Figma, Tailwind CSS* | [Live](#)

- Designed the full UX (cashier flow under 3 seconds for non-tech users), then engineered the multi-tenant React app: tap-to-charge keypad, RFID card flows, WhatsApp receipts, daily settlement CSV/PDF, bonus engine, staff accounts, Today's Summary analytics, custom per-tenant theming.
- 3-layer Firestore tenant isolation — database rules, app-level tenantId checks, and Cloud Function validation all enforced simultaneously.

Vitran – B2B Wholesale Distribution Platform | *React, Firebase, Figma, Tailwind CSS* | [Live](#)

- Designed 5 role-based interfaces (wholesaler, field agent, retailer, admin, open network) and engineered all 15 modules: GST invoicing (SHA-256 tamper-proof), GSTR-1/3B reports, Tally XML export, Web Bluetooth + ESC/POS driverless printing, field agent app, retailer portal.

Shop-ERP – Retail POS/ERP | *React, Firebase, Figma, WhatsApp API* | [Live – 300+ Users](#)

- Designed and built end-to-end: RFID auth, real-time Firestore tracking, Cloud Functions for automated invoicing and PDF generation, WhatsApp delivery. 300+ paying customers, zero critical downtime, 10+ months.

Enda – Global Footwear Brand Website | *Figma, React, UX Research, Tailwind CSS, GSAP* | [Live](#)

- UX research, site map, wireframes, Figma design system, and React production build with GSAP scroll animations. Sole contributor from research to deployment.

MediTrack – Healthcare SaaS | *Figma, UX Research, Design Systems* | [Portfolio](#)

- 5 user interviews → problem definition → 10-screen SaaS design (desktop + mobile) with complete design system and developer handoff documentation.

EDUCATION

Parul University

B.Tech – Computer Science & Engineering | CGPA: 7.9/10

Vadodara, Gujarat, India

Jun 2021 – Jun 2025
