SUMMARY

Product designer and engineer with 2+ years of shipping software end to end, from the first user interview to production support. Co-owner of PrimeDigitals, where I design and build our SaaS for Indian retail and trade, including Shop-ERP (300+ paying merchants), and UI/UX designer for client products at UMM Digital. Equal depth in UX research, design systems and Figma, and in React, Next.js, Firebase, PostgreSQL and multi-tenant architecture.

EXPERIENCE

Co-owner, PrimeDigitals

Jul 2024 – Present · Remote

- Co-own a product studio that builds SaaS for Indian retail and trade. I lead product design and engineering on every product, from customer interviews to production support.
- Designed and built Shop-ERP, a POS/ERP (React + Firebase) used by 300+ paying merchants: 10+ months live with zero critical downtime; month-end billing per shop cut from 4–6 hours to under 30 minutes.
- Shipped Touchpe (multi-tenant prepaid tap-to-pay POS), Vitran (5-role B2B wholesale platform) and Trade CRM (deal-pipeline CRM for chemical traders, Phase 1 live).
- Own the shared architecture: tenant data isolation (Firestore rules, PostgreSQL company scoping), Cloud Functions billing, WhatsApp Business API delivery and Lighthouse 90+ performance.

UI/UX Designer, UMM Digital (Remote Agency)

Dec 2024 – Present · Remote

- Lead UI/UX across 4+ concurrent client projects, owning the full lifecycle: brief, UX research, information architecture, wireframes, high-fidelity Figma and developer handoff.
- Designed and built Hazeberg, a 13-page animation-first site for a Workday consultancy: a design system in code, a WebGL hero, pinned scroll scenes and a Sanity CMS the client edits without code.
- Designed Enda (global footwear brand) end to end as sole contributor: UX research, IA, a 30+ component Figma design system and the React production build.
- Designed UI systems for XTR, Shounya and GOG Games. Structured component libraries and design tokens cut design iteration cycles by ~30%.

SELECTED PRODUCTS

Touchpe · Prepaid tap-to-pay POS — React, Firebase, Tailwind CSS — Live

- Cashier flow under 3 seconds for non-technical staff; card issue/block/replace, WhatsApp receipts, daily settlement export, bonus engine, staff accounts and per-tenant theming. 3-layer tenant isolation: Firestore rules, app-level checks and Cloud Function validation.

Vitran · B2B wholesale distribution — React, Firebase, Tailwind CSS — Live

- 5 role-based apps across 15 modules: GST invoices with SHA-256 tamper-proof hashing, GSTR-1/3B reports, Tally XML export, and driverless thermal printing over Web Bluetooth + ESC/POS.

Trade CRM · Deal-pipeline CRM — Next.js, TypeScript, PostgreSQL — Live demo

- One 7-step track per deal from inquiry to invoice, organised around who owes the next step. 15-table multi-tenant schema, server-enforced roles, row-locked transactions and document scanning into drafts.

Shop-ERP · Retail POS/ERP — React, Firebase, WhatsApp API — Live · 300+ merchants

- RFID customer check-in, real-time Firestore purchase tracking, and Cloud Functions that generate month-end PDF invoices and deliver them over WhatsApp the same day.

SKILLS

Design	UX research, journey mapping, information architecture, wireframing, usability testing, Figma (expert), design systems and tokens, prototyping, developer handoff
Frontend	React, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, GSAP, Framer Motion, WebGL shaders, mobile-first layouts
Backend & data	Firebase (Auth, Firestore, Cloud Functions, Security Rules), PostgreSQL, Drizzle ORM, Zod, REST APIs, WhatsApp Business API, Sanity CMS
Quality & tools	Lighthouse 90+, Core Web Vitals, code splitting, Playwright tests, Git, Vercel, Vite, Photoshop, Illustrator, Claude, GitHub Copilot

EDUCATION

B.Tech, Computer Science & Engineering

Jun 2021 – Jun 2025

Parul University, Vadodara, Gujarat, India · CGPA 7.9/10

Languages English (professional), Hindi (native), Gujarati (native)
